

# MULTI FUNCTION CONTROL VALVE: Electronically Controlled

CAPABLE OF CREATING TWO INDIVIDUAL HYDRAULIC CIRCUITS FROM A SINGLE HYDRAULIC PUMP

- ✓ Flowing Dividing
- ✓ Electronically Controlled Hydraulic Valve
- ✓ Manual Backup
- ✓ Each Hydraulic Circuit can be Isolated and Shut Down without the other Circuit being Affected
- ✓ Input Control for Valves can be either 0-5V or 4-20ma
- ✓ Standard Valves up to 35 GPM Flow Rate Per Circuit
- ✓ SCADA Compatible
